Full-stack developer based in Jaipur. I build websites and web apps with React, Next.js, TypeScript and Node, then deploy them and set up the SEO myself. At Pixeelnest I built the company site and three client sites on my own, and wrote Omnikeys, a Windows tool that rewrites selected text with an LLM. I started in business analysis and customer support, so I am used to talking with clients and turning what they want into clear requirements.
